ABOUT ME

I am a Front-End Developer with 2+ years of experience specializing in Next.js, React.js, TypeScript, and TailwindCSS. I've worked on SaaS dashboards and learning platforms, focusing on clean, maintainable code and strong UI/UX. I enjoy building scalable front-end features, collaborating with teams, and continuously learning new technologies.

SKILLS

Frontend: Next.js, React.js, JavaScript (ES6+), TypeScript

UI & Styling: Tailwind CSS, MUI (Material UI)

State/Data & API: React Query

Data Visualization: Chart.js

Tools & Version Control: Git

Workflow/Methodologies: Scrum (Agile)

EXPERIENCE

TrueFlow, Remote - *Founder & FrontEnd Developer*

Nov 2025 - Now - 7 Months - TrueFlow.ir - Under Development

- Developed the front-end of a Human Resource Management System (HRMS) using Next.js, TypeScript, and Tailwind CSS.
- Built a modular dashboard including leave management, finance, tasks, departments, daily routines, team chat, and settings.
- Applied Feature-First architecture, i18n, and an RBAC-ready structure to improve scalability and maintainability.
- Created reusable, type-safe components and implemented a modern UI with Glassmorphism design.

Toppira, Remote - *Founder & FrontEnd Developer*

Sep 2025 - Now - 9 Months - Toppira.com

- Developed the front-end of an open-source AI-powered productivity platform using Next.js, React.js, TypeScript, and TailwindCSS.
- Built and shipped core productivity modules including task management, reminders, notes, and AI-assisted workflow features.
- Designed reusable UI components, scalable application architecture, and responsive interfaces to support future platform growth.
- Integrated AI-driven interactions into existing productivity workflows, enabling smarter task management and contextual user experiences.
- Collaborated with developers and contributors in an open-source environment, participating in feature development, code reviews, and product discussions.
- Optimized application performance, accessibility, and user experience through modern front-end best practices and efficient state management.
- Contributed to the platform's vision of combining traditional productivity applications with artificial intelligence to deliver faster and more effective communication.

Qbify, Qazvin - *FrontEnd Developer*

July 2025 - Dec 2025 - 6 Months - Not Open Source

- Built and shipped major front-end features of Qbify using Next.js, TypeScript, TailwindCSS.
- Implemented dashboards, CRUD modules, forms, charts, reusable components, and complex data-driven interfaces.
- Integrated APIs with React Query, optimized data fetching strategies, and improved application performance and user experience.
- Developed responsive and accessible UI components while maintaining scalability, code quality, and design consistency across the platform.
- Worked closely with designers and backend engineers in an agile environment to translate business requirements into production-ready features.
- Contributed to code reviews, debugging, testing, and performance optimization initiatives to ensure a reliable and maintainable codebase.

Horton, Remote - *FrontEnd Developer*

Nov 2024 - June 2025 - 8 Months - hortonapp.com

- Developed the front-end of a language learning website using Next.js, React.js, TypeScript, TailwindCSS, React Query, and MUI.
- Collaborated effectively with the development team, including a senior front-end engineer, following Agile methodologies.
- Designed and implemented a vocabulary management system to identify and display words that users need to review again.
- Built reusable UI components and optimized overall user experience and performance.
- Integrated and managed data using React Query, improving data flow across different parts of the project.

Freelance Projects

Gaming Pannel, Remote - *FrontEnd Developer*

Dec 2025 - Jan 2026 - 1 Months - github.com/DaRiaN0Dev/pause-menu-irm

- Developed and delivered a modern gaming control panel featuring player profiles, progression systems, licenses, businesses, properties, and battle pass management.
- Built complex dashboard interfaces, reusable UI components, dynamic forms, and data-driven modules using React.js, TypeScript, and TailwindCSS.
- Implemented responsive layouts and interactive user experiences optimized for desktop gaming environments.
- Integrated backend APIs for real-time player statistics, account information, progression tracking, and game-related management features.
- Designed scalable front-end architecture and reusable component patterns to support future feature expansion and maintainability.
- Collaborated directly with the client to gather requirements, refine UI/UX decisions, and deliver production-ready solutions.
- Optimized application performance, state management, and user workflows to ensure a smooth and engaging experience.

EDUCATION

Azad Univercity, Qazvin - *Computer Engineering*

2025 - Present

Sampad, Qazvin - *Mathematics*

2021 - 2025
